

BEVERAGE CONTAINER HOLDER FOR VEHICLES

ABSTRACT OF THE DISCLOSURE

[0022] A beverage container holder for a vehicle is disclosed. The holder includes an air vent portion, and a beverage container support portion movably but not removably disposed at the vent portion. The support portion has a first position arranged to permit air passage through the vent portion and the support portion in the absence of a beverage container, and a second position arranged to permit air passage through the vent portion and to hold a beverage container.
